

MELDEB CONSTRUCTION LTD

City Works, Manchester

Client – Allenbuild

The City Works, Phase 2 is a development of high quality small/medium industrial units. Allenbuild are the Main Contractor and we have been employed to install all elements of the groundworks packages, including sub-structure, drainage, external works and structural floor slabs. During construction, many obstacles were encountered due to the site previously housing Manchester City Works, such as steel columns and culverts. We were pro-active in our approach in advising the Main Contractor how best to remedy these issues in a safe, practical and cost efficient manner.

Unit 3A, Clifton Business Park, Preston, PR4 0QX.
